

**Methodology to calculate marks (out of 500) in Class 10+2
examination of Board of Intermediate Education (Andhra Pradesh)**

Marks/grades of only the second year (Class XII) will be considered.

1. Conversion of grades to absolute scores should be as follows:
A1=100, A2=90, B1=80, B2=70, C1=60, C2=50, D1=40, F=34
2. Physics/Chemistry/Biology absolute scores:
Mean of scores of theory exam and the practical exam in second year.
3. Mathematics absolute score:
Mean score of Math A and Math B in second year.

Finally, the methodology to calculate marks (out of 500) will be:

The following five subjects will be considered for calculating the cut-off marks for fulfilling the eligibility criterion so that the total aggregate marks are out of 500:

- (i) Chemistry
- (ii) Physics
- (iii) Biology or Mathematics
- (iv) One language (if the candidate has taken more than one language course, then the language course with the highest marks will be considered)
- (v) Any subject other than the ones used in the above four (the subject with highest marks will be considered)

After considering four subjects as mentioned in points (i) to (iv), one must consider the subject with the highest marks among all remaining subjects in his/her mark-sheet/grade-sheet. Please note that the subject for point (v) could also be a language course or Mathematics or Biology, provided that it is not being considered in any of the points (i) to (iv), and such that it is the subject with highest marks among all remaining subjects in the mark-sheet/grade-sheet.
